Thank you for the information.

No change to text.

Kansas referred Pretty Prairie to EPA for enforcement several years ago. From EPA's lack of action in this case KDHE is less likely to take state action in any similar case.

Please note that the Pretty Prairie case is somewhat unique given the scope of KDHE's Nitrate Policy, which is addressed in KDHE's Order with the PWS. This single situation, however, should not be the basis upon which an entire enforcement approach is based.
